Agenda

Data Center Introduction

Data Center from the ground Up

Data Centers – Market Analysis

TOP BENEFITS

Q & A

Introduction

- A **data center** or **data centre** is a facility used to house computer systems and associated components, such as telecommunications and storage systems. It generally includes redundant or backup systems
- A large data center is an industrial-scale operation using as much electricity as a small town.

FLASHBACK

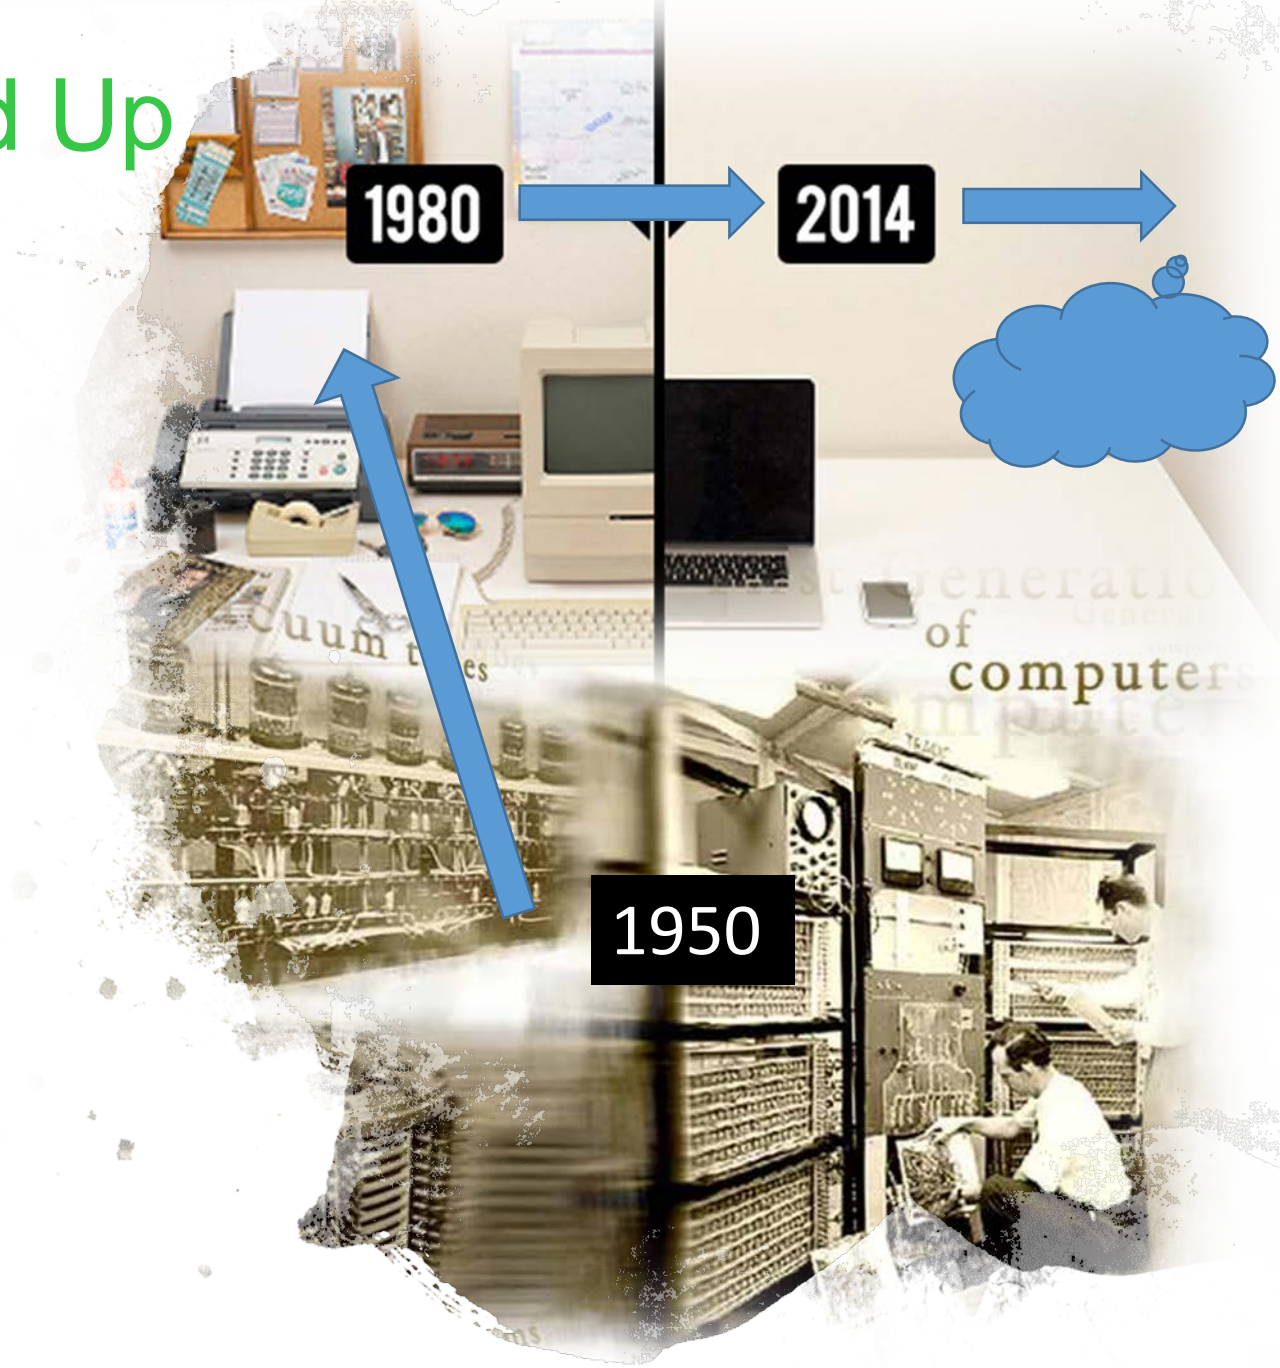

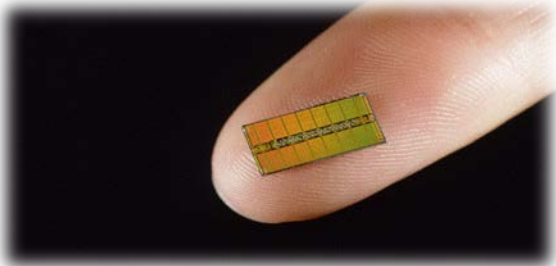

- The First Data Centre in the 1950s when American Airlines create a passenger reservations system

Data Center from the ground Up

The Evolution of Technology

- Starting from Vacuum Tubes to Transistors and Integrated Circuits "IC's"

Pre-Certified Design

Data Center Solutions
Today, ready for
Tomorrow!

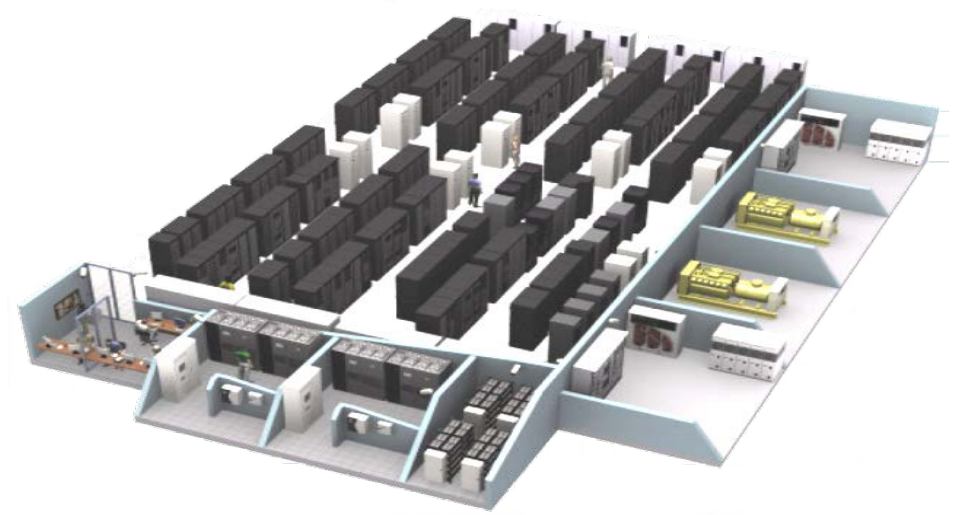

Market Analysis

- 70% of data center operators will build a new site or renovate a site

TOP THREE BENEFITS Of Using Pre-Certified Designs:

- Simple: to plan, design and deploy
- Adaptable – pre-validated
- minimize the risks of unknown and downtime. •
Manageable – simplify your life, reduce costs and business challenges.
